

# Reach for the stars.

Early learners will be able to explore astronomy like never before in this complimentary iBooks® textbook. It's a perfect resource to expose students to critical STEM content!

# A Galaxy of Information Awaits You

This iBooks textbook is packed with fascinating information to inspire students to learn more. They'll explore the science of astronomy, the latest scientific advances, and the tools that make those advances possible.

In addition, they'll discover how the universe began, how different kinds of stars are born, and how those stars change over the course of their lives. And they'll take a closer look at the Tarantula Nebula, the largest and most intense region of star formation in the Local Group of galaxies.

## Special Features

- Voice-over screen reader on iPad® compatibility.
- Refreshable Braille display compatibility.
- Tactile overlays available from National Braille Press.
- Sonification of data visualizations.
- Captioning.

*Reach for the Stars* was made possible by support from NASA for EO-12939.17 Education and Public Outreach program "Tarantula Nebula E/PO."

It's time to blast off into a whole new learning experience!
