Why should you join #SASHackathon?

The SAS Hackathon is all about bringing innovation to society and the marketplace. And we believe ideas need to be nurtured and developed using your preferred language with the latest technology. Teams have access to a cloud environment on SAS® Viya®, a faster, more productive AI and analytics platform that enables collaboration. This hackathon is more than a competition. It's a monthlong digital event.

Collaborate with fellow coders
— from experienced data scientists to novice technology partners and SAS experts — using SAS and open source on Microsoft Azure.

Tackle a real-world challenge
— a business and or sustainability issue — that is meaningful to you and your team.

Develop your application
for the marketplace — potentially with help from SAS. There's no monetary prize. Teams own their IP (intellectual property) and can pursue commercialization.

Get enablement resources
and coaching on AI, cloud environments and industries, as well as access to training courses and virtual learning labs at no cost.

Extend your network
from local to global sharing with other professionals.
